

SANDRAIL RACE

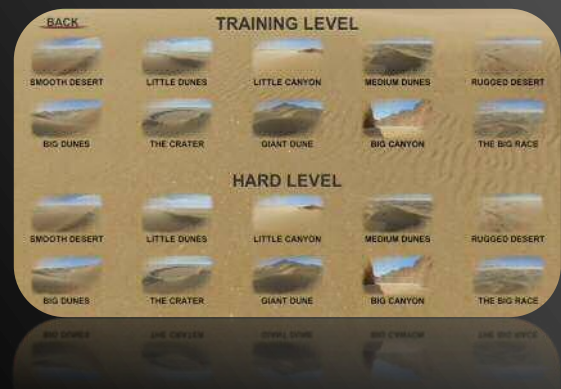

Owner's manual

IMPORTANT NOTICE: This video game does not carry out payments, collections, bets, or any other monetization system apart from its purchase price.

‘Sandrail Race’ is a sandrail-type cars video game (cars built for sand racing).

At 'Sandrail Race', an effort has been made to convey to the player all the sensations of freedom, fun and simplicity of these powerful vehicles manufactured exclusively to reach high speeds over sand thanks to their lightness and powerful engines.

To complete the game you must win 20 races. The first ten are training, in them your opponents will not have all the extras, when you complete them, you will have to win all ten races again in hard level, your opponents will have all the extras installed and you will need to prepare your vehicle to full in order to win. (Once the game is over you can continue playing on any of the races).

Races will be available only once you have finished first in the previous race.

In training mode you will receive \$400 for coming in first, \$200 for coming in second, and \$100 for coming in third.

In hard mode you will receive \$2000 for coming in first, \$1000 for coming in second, and \$500 for coming in third.

When you get money for winning races you can buy better carburators, competition exhaust systems, tires with paddles for sand, shock absorbers with extra lengths, vinyls, and you can paint the vehicle to your liking in the ‘BOX’ menú.

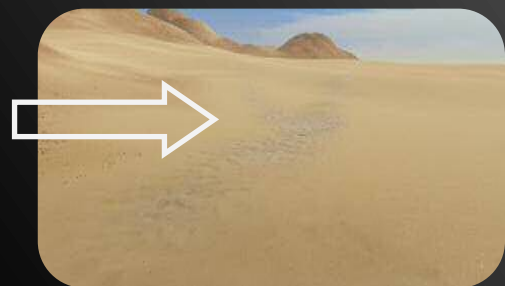

The extra tires give you more traction and acceleration on starts and climbs, the long lengths shock absorbers give you more stability on very bumpy terrain, but less stability in jumps, the intake system increases the acceleration a lot, and the exhaust system provide you with a little more acceleration, but above all, they give you more top speed, which is very important for overtake other vehicles.

It is convenient to earn money in the easiest races and buy extras to be able to win in the higher level races.

Search, try and learn the best routes to be able to win, don't always trust the shortest route

When you lose sight of the waypoints, you will have to guide yourself quickly in the desert with no more help than your sense of direction and sight. Learn the landscapes and the best routes, and when in doubt which is the best path, look for the markings of other vehicles on the ground.

When you run without extras, to gain acceleration, you can hold full throttle while braking, so you don't lose engine momentum.

You will stay distraction-free with the data gauges to be able to focus on the bumps, the course, and the stability of your vehicle.

You can look back, but you'll waste time, you better get used to relying on sound to calculate your distance to other vehicles.

You can move the camera to take pictures of the landscapes, but to compete, nothing like the rear exterior view, that together with the gamepad vibration allows you to capture the stability and exact position of your vehicle at all times.

Game controls in race:

If it has vibration, your gamepad will vibrate in each jump, collision, skids, and velocity.

TAKE A PICTURE

Only in 'Camera mode'

Also mouse: LMB.

CAMERA MODE

Activate/Deactivate

Also mouse: MMB

REAR VIEW

Also keyboard: 'Left CTRL'

BRAKE

Also keyboard: 's' '↓'

PAUSE/EXIT

Also keyboard: 'ESC'

THROTTLE

Also keyboard: 'w' '↑'

(((((VIBRATION)))))

(((((VIBRATION)))))

STEERING

Also keyboard: 'a' 'd' '←' '→'

BACKWARDS GEAR

Also keyboard: 'LEFT ALT'

CAMERA POSITION

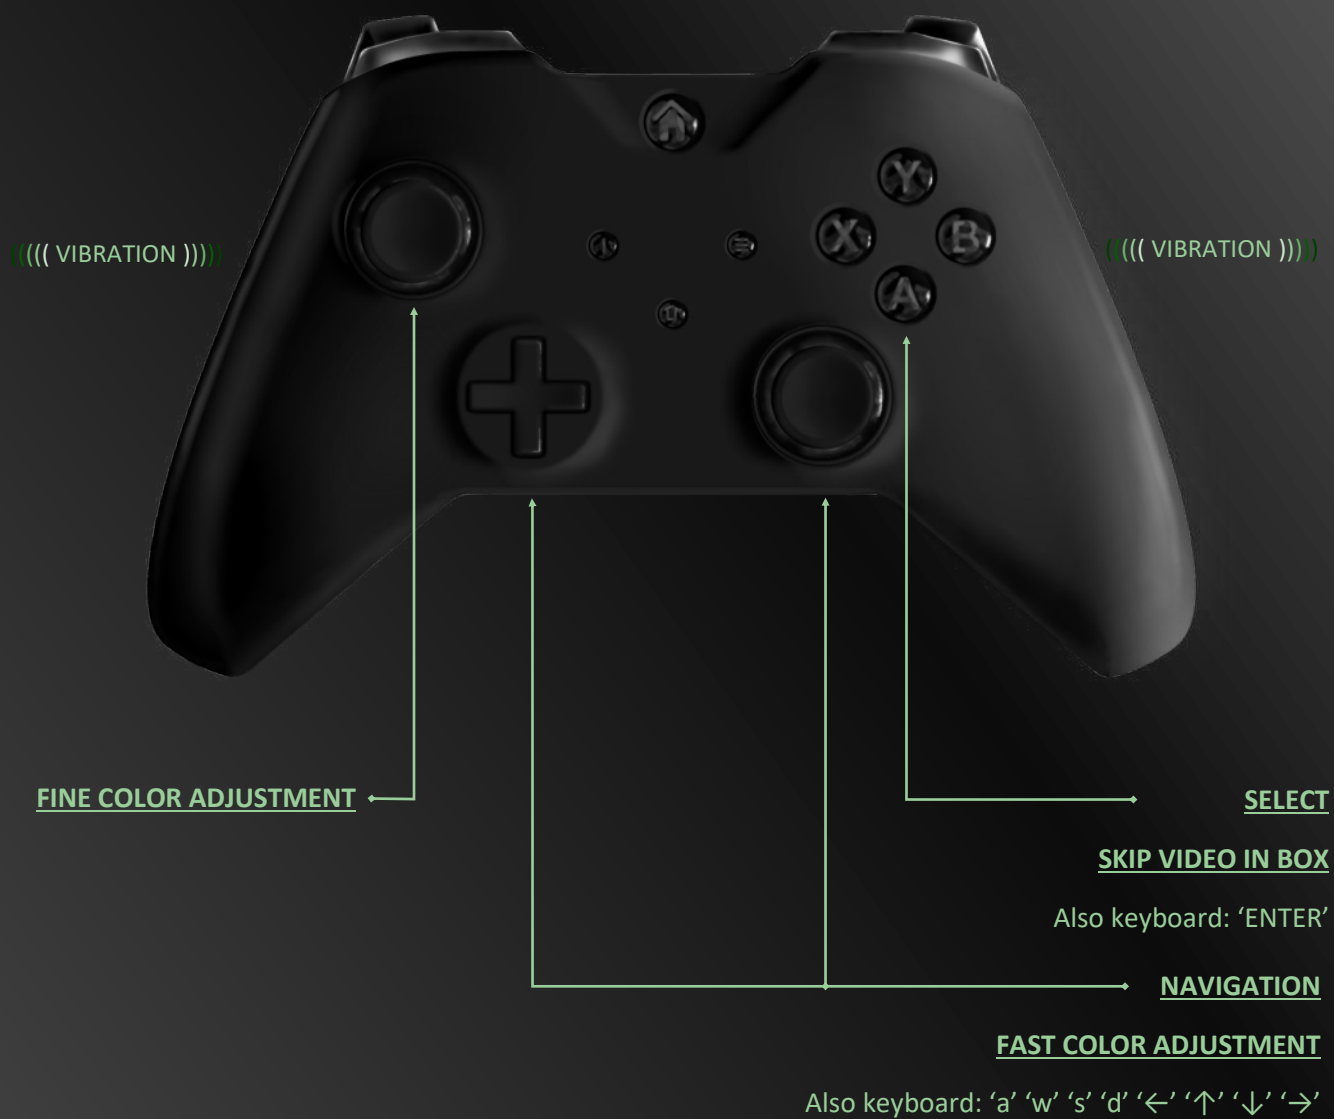

Only in 'Camera mode'

Also mouse: movement

Game controls in menu:

If it has vibration, your gamepad will vibrate at each movement of navigation through the menus.

When more powerful your computer is, better the game experience will be, but if your computer is not very powerful, in the 'Config.' menú you can adjust the screen resolution, the quality/quantity of visual effects, and remove the movements of the suspension elements, to improve the playback speed a bit.

In the 'Config.' menú you can also choose the language (English/Spanish).

Minimum system requirements:

OS: Windows 10 64-bit, o Windows 11 64-bit

Controller: Gamepad compatible Xbox, o teclado y ratón.

Storage: 1GB available hard disk space.

IMPORTANTE: The game can be set to specifications slightly lower than the recommended requirements, reducing graphical effects, but functionality will be degraded proportionally to the hardware used.

Recommended system requirements:

Processor: Pentium i7

Memory: 8 GB RAM or better.

Graphics: Nvidia GTX 1650 4gb, or better.

Controller: Gamepad with vibration, Xbox compatible.

Sound card: DirectX compatible, surround sound with speakers, or headphones 7.1

ADVICE: This video game does not carry out payments, collections, bets, or any other monetization system apart from its purchase price.

ADVICE: This video game includes languages: English and Spanish.
